

» Have You Overlooked Your Printers?

Rein in Your Fleet with a Managed Print Assessment

Printers, while integral to the success of your daily operations, are an often-overlooked component of your organization's infrastructure. Their high maintenance and supply costs are traditionally dismissed as a fixed expense. However, with the proper tools in place to effectively manage your printer infrastructure, you can achieve significant savings and efficiencies. PC Connection offers complimentary printer assessments that can help you better understand, plan for, and reduce the cost impact of your printer fleet. Our valuable services give you the resources and tools to streamline your operations and save money.

Reduce Costs and Improve Performance

A printer's purchase price is only a small percentage of its ultimate total cost of ownership. Ongoing supply costs, asset management, and IT support account for the bulk of the expense. PC Connection can help you reduce these costs and plan for future ones. Our Managed Print Assessment provides your organization with detailed reports of expenses, allowing you to spot trends, eliminate inefficiencies, reduce costs, and achieve better performance.

- We conduct our assessment service by collecting data specific to your environment, using a secure, software-based Device Discovery Collection and Monitoring Tool
- The secure monitoring tool will record your organization's printer and usage information over a 30-day period
- Collected data is then reviewed and analyzed through a secure Web browser
- At the close of the assessment, our team provides you with a detailed report of recommendations for customized printer consolidation along with data relevant to your specific devices, including:
 - Page counts • Toner usage • Device status
 - Device descriptions • Serial numbers • Asset numbers
 - Location • Cost per copy • Utilization • Trending reports

Managed Print Assessment Benefits

A Managed Print Assessment provides valuable data that can help your organization:

- Identify the number of print devices, makes and models, on your network
- Measure the total cost of ownership (TCO) and return on investment (ROI) expectations
- Make immediate changes that reduce costs and improve overall operational efficiencies
- Manage your existing print fleet with zero capital expenditure on your part

Printer Assessment Program Conditions

Our printer assessment services are for customers with a minimum of 25 printers in a network environment or printed page usage of 25K+ per month.
